Technical Skills

• C • C++ • HTML • CSS
• JavaScript • React • Node.js
• MongoDB • Amazon AWS
• Microsoft Azure
• Python • MySQL • Docker
• Kubernetes • CI/CD
• DevOps • UI/UX

Concepts

Data Structure and Algorithm
Operating Systems
Database Management(DBMS)
Cloud Computing
OOPS Concept
Computer Network

Soft Skills

Communication Skills
Teamwork and Collaboration
Problem Solving
Leadership
Work Ethics
Conflict Resolution

Spoken Languages

English | Hindi

Extracurricular

Technical Team Member

Career Objective

Aspiring software engineer with a strong foundation in programming, problem-solving, and emerging technologies. Eager to contribute innovative solutions and collaborate on impactful projects to drive business success. Committed to continuous learning and leveraging skills to deliver efficient, scalable, and user-centric software applications.

Education

2022–Present

Chandigarh University

Bachelor of Engineering - Computer Science Engineering

CGPA: 7.30

Mohali, Punjab (IN)

Projects

2025

Ransomware Detection System

Product

- **Developed a cloud-based ransomware detection system** leveraging behavioral analysis and machine learning to identify malicious file encryption patterns in real-time.
- **Implemented anomaly detection models** using Python and Scikit-learn to monitor file system activities, flagging suspicious behavior with over 90% accuracy.
- **Integrated the detection engine with cloud services** such as AWS Lambda, S3, and SNS for automated threat alerts and incident response.
- **Reduced potential ransomware impact** by enabling early threat identification and response, decreasing average containment time by 40%.

2025

AI - Powered Finance Assistant

Product

- **Developed an AI-powered finance assistant** to automate tasks like budgeting, expense tracking, and investment analysis using Next.js, Drizzle ORM, Neon DB, and Clerk for authentication.
- **Designed and trained machine learning models** for personalized financial recommendations, cash flow prediction, and risk assessment.
- **Built a user-friendly dashboard** with real-time financial insights and visualizations using modern frontend frameworks and deployed it on scalable cloud platforms.
- **Achieved measurable impact**, reducing manual financial management time by 20% and improving financial decision-making for many users.

2023

Prevention of Data Leak using SQL injection

Review Paper

- **Authored a comprehensive review paper** analyzing SQL injection vulnerabilities, their role in data breaches, and state-of-the-art prevention techniques.
- **Explored and compared mitigation strategies**, including input validation, parameterized queries, stored procedures, and Web Application Firewalls (WAFs), emphasizing their practical implementation.
- **Conducted an in-depth study of real-world SQL injection attacks**, identifying lessons learned and proposing robust preventive measures to safeguard sensitive data.
- **Highlighted emerging trends** like AI/ML-driven attack detection and blockchain-based solutions for secure database management in the paper.

Certifications

2025
